

Orchid Orthopedic Solutions, LLC - A leader in cutting tool technology

**You may know implants, but are  
cutting instruments a  
core competency?**

**We've been providing  
Custom Cutting Instrument Solutions**

~ since 1977 ~

ISO 13485:2003

### **Cutting Instruments are at our Core!**

Orchid has 30+ years experience in the design and manufacture of orthopedic and surgical cutting instruments. Our experience has allowed us to provide superior services in grinding, machining, and finishing of your cutting tools.

**Prototypes for your  
new designs in your  
hands in as little as  
2 weeks!**

**Custom Design, designed for YOUR implants and YOUR procedure** – We take your design inputs and a clear understanding of the procedure, and provide you 3D CAD models and final manufacturing detail drawings of the necessary instruments to complete your total system. Based on years of clinical and manufacturing experience, Orchid leads the way for the highest quality edges for your tissue cutting needs.

**Surgical Drill Bits and Reamers** – We produce solid and cannulated drills and reamers, dental implant cutters, step drills and reamers for orthopedic, maxillo-facial, cranial/neuro and ENT procedures.

**Surgical Cutting Burs** – Fluted and diamond coated burs for otology, podiatry, arthroscopy, neuro, maxillo-facial and other surgical specialties.

**Surgical Blades** – We manufacture an extensive array of blades used in total knee procedures, arthroscopy applications involving ACL reconstruction, podiatry and other specialties.
